

# UPGRADE package

Upgrade package, control system GOLD

## What is it?

The UPGRADE package is a spare parts solution for the refurbishment of older GOLD air handling units. It also brings an upgrade of older GOLD versions to the control system and functionality as in version F.

Suitable for GOLD air handling units delivered between 1997 - 2004 as set out below:

- Version 3/4, sizes 4 and 5.
- Versions A and B, all sizes.

## What are the primary benefits?

- Avoid major work on the building.
- Lower investment cost.
- Fast and straightforward implementation that only marginally disrupts daily operations.
- Extended lifespan for the GOLD air handling unit.
- Improved functionality.

## What do you get?

- User-friendly interface with IQlogic control system and IQnavigator hand-held terminal.
- Extended functionality and BMS communication.
- Possibility for future upgrades to latest functionality.

## How does it work and what is included?

A Swegon technician or other representative will inspect the air handling unit in question to determine if an upgrade is appropriate.

The upgrade package is ordered and a Swegon technician installs the upgrade package and starts up the air handling unit.

All essential components are included, such as

- IQlogic controller
- IQnavigator 7" hand-held terminal
- sensors (pressure, temperature)
- fan motor controllers
- heat exchanger control system
